 Respiratory
 Depression*

SIMPLE OPERATION.

After weighing the patient in Kilograms, select the patient's correct weight on the pad and digital display located on the front of the system. The system then automatically selects certain respiratory parameters based precisely on the weight you have entered. These parameters are: **liters delivered per minute, breaths administered per minute and peak inspiratory pressure.** In this mode, respiration is completely controlled for the patient.

Adjustable Assist Mode: Selecting the 'assist mode' causes the system to wait for the initiation of a breath by the patient. If the patient does not spontaneously initiate a breath, the system will automatically begin the breathing cycle for the patient at the set parameters. The digital display will even tell you whether the patient or the system initiated each breath.

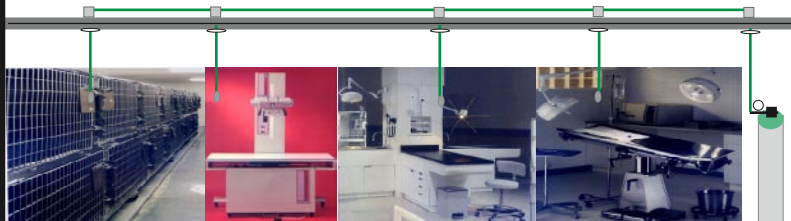

You Retain Complete Control: You may override any of the parameters at any time before or during the entire procedure - and completely set all parameters to exactly what you want. In essence, you can let it function automatically or take complete control of the system at any time. It may also be used without the vaporizer as a 'critical care ventilator.'

Easy To Use With Increased Patient Safety: As you can see from the above, you don't have to be a 'rocket scientist' to understand and use it. Since the system assures you the patient is indeed going to remain breathing while on the system, you can safely release your technician for other duties during a procedure.

Battery Backup For Safety: The system comes equipped with an internal battery back up that can operate the system up to 12 hours in case of power failure.

COMPLETE 2 Year Factory Warranty on the system.

COMPLETE CUSTOM VALU-LINE O2 DELIVERY SYSTEM WITH *FOUR* CEILING DROP 'QUICK-CONNECTS'
MAKES USING YOUR SYSTEM AT ANY LOCATION A 'SNAP'
(CUSTOMIZED JUST FOR YOUR PRACTICE LOCATION)
 (See Page 14B Of MPS Equipment Book For Everything Included In Your 4-Drop System)

EACH O2 DELIVERY SYSTEM IS COMPLETE & CUSTOM MADE JUST FOR YOUR PRACTICE LOCATION.
